

Position: iPhone Mobile Developer

The Company:

IPPLEX researches and develops pioneering cross-platform applications and services focused on interactive communication – between people and the information, contacts and places they need to access through their mobile phone, PC, and other devices. Our global and diverse team of engineers, scientists, and researchers with world-class expertise in video conferencing, object recognition, object tracking, and augmented reality is committed to continuous innovation and fostering an entrepreneurial culture that will accelerate the commercialization of our revolutionary technologies.

IPPLEX is the recipient of multiple grants from the National Institutes of Health (NIH) and National Eye Institute (NEI), and our products have won multiple awards including 1st place at the 2010 CTIA E-Tech Awards. Our latest product release, LookTel Money Reader for iPhone, leverages our real-time recognition capabilities to enable users with visual impairments or blindness to instantly recognize dollar bills. It has been recognized by the [New York Times](#), [Engadget](#), and several other major publications.

Position: iPhone Mobile Developer

Job Description

We are looking for an iPhone software engineer to build the next generation of iOS applications. This individual will push the boundary of iOS to new levels using our latest technology in object recognition, video conferencing, and augmented reality. You'll have a chance to work on exciting projects and expand your experience in all of these areas and more. Our company has relationships in place where your work will touch millions of users in front of major brands, go into gaming, help specific populations with needs, and more.

We like problem solvers, If you are a passionate technologist and can get a lot done while having fun, come join a team of like-minded professionals where you can learn and share your knowledge.

Must Haves:

- Experience developing apps in Cocoa and Objective C for iPhone/iPod Touch
- Experience integrating iOS apps with APIs and other web services
- Bachelors degree in Computer Science or related technical field
- Familiarity with other mobile application development technologies (Android, Symbian, J2ME) a plus
- Success shipping at least 1 app into the app store a plus
- Experience with HTML, Javascript, PHP, MySQL and Mobile web a plus

Responsibilities

- Building high quality iPhone applications
- Building great UI with our in-house designer
- Participate in fast-paced development cycles
- Come up with exciting ideas and products within IPPLEX
- Prototype new UI and workflows with our team

To apply, please send a personal note telling us about who you are, what you've been doing, and what makes this job appealing to you. Include a resume, salary requirements, and some links to things you've done to jobs@ipplex.com. EEO
